Project 1 Extra Credits
(due October 27, 2011)

Worth 50 project points. Names of participants to receive credits should be shown in the movies.

Produce a short movies clip (3-5 min) describing what the team has done in Project 1 including the following information

1) Building the system pointing to particular design elements to reduce uncertainties and to enhance predictability, with audio explanation to go along with the images (10 points)
2) Producing the spreadsheets: pointing to columns A-F in one spreadsheet, then show spreadsheets with different graphs for different models, then explain which one is the best. Audio explanation should accompany the images. (10 points)
3) Describe how was predictability tested for a requested X value, what is the predicted Y', what are the measured Y_1, Y_2, Y_3, their average, and percentage of accuracy (10 points)
4) Comments on possible improvements for your system (10 Points)
5) Clarity of image and audio (10 points)

The movies should be submitted in an electronic file on the due date, by emailing the instructor at his gmail account.
