Project 1 Extra Credits
(due March 26, 2009)

Worth 50 project points. Names of participants to receive credits should be included in the movies.
Produce a max. 3 min movies describing what to do in Project 1:
1) Building the system paying attention to particular design elements to reduce uncertainties and enhance predictability
2) Producing the spreadsheet in steps with the three different models, which one is the best
3) Describe how was predictability tested for a requested X value, what are the Y', Y_1, Y_2, Y_3, their average, and percentage of accuracy
4) Comments on possible improvements for your system
